-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2818

The amendment filed July 7, 2005 has been entered and made of record as paper no. 0705.

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11, 13-15, 18, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants' prior art figures 1 and 2 in view of Oda (US 2004/0150112 A1).

Applicants' prior art figures 1 and 2 discloses a copper interconnecting metallization (102) protected by a first overcoat layer (104), a patterned conductive barrier layer (103b), and a bondable metal layer (120 or 210) positioned on the barrier layer. However, Applicants' prior art figures 1 and 2 do not disclose the second overcoat layer. Oda discloses in figure 1 a second overcoat layer formed on the bondable metal layer (730) so that the edge of the second overcoat layer overlays the edge of the bondable layer positioned on portions of the first overcoat layer (740) surrounding the window. Therefore, it would have been obvious to one of ordinary skill in the art to form a second overcoat layer as taught by Oda on the bondable metal layer of Applicants'

prior art figures 1 and 2 in order to protect the surface of the bondable metal layer. The subject matter in claims 2-11 are already disclosed by Applicants' prior art.

Claims 12 and 19-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants' prior art figures 1 and 2 in view of Oda as applied to claims 1- above, and further in view of Chooi et al.

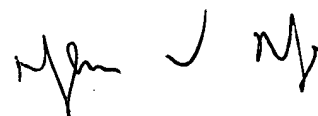

Chooi further teaches that the overcoat layer can be made of silicon nitride or silicon oxynitride. Note lines 56-58, column 7 of Chooi. Therefore, it would have been obvious to one of ordinary skill in the art to use silicon oxynitride as an overcoat layer as taught by Chooi.

The other references are cited to show other structures pertinent to Applicants' disclosure. All of these references disclose a second overcoat layer formed on the bondable metal layer.
